SOFTWARE EXPERIENCE

September-November 2020:
_nology Software Development Course:

Intensive online course with focus on:

- **Git, HTML, CSS, JavaScript, Yarn, APIs and Authentication & Authorisation.**
- **Libraries and frameworks such as SASS, React and Bootstrap.**
- **Firebase (hosting, database & authorisation), Node.js and Express.**

These skills enable me to build responsive web apps which run on concise code.

SKILLS AND EXPERIENCE

- Five years as an R.A.F. cadet at the R.C.S, reaching the rank of Sergeant in my final year where I supervised an entire year group.
- Air experience flying in a Grob Tutor.
- Leading Non-Commissioned Officer in a 24-hour exercise which gave me leadership experience.
- Led my 3rd Year Physics final project to a mark of 86.54%.
- Excellent analytical and reasoning skills (Learned Java/Python on my Physics course).
- Good basic language skills - A* and A grades in German and Latin GCSE respectively.

PROFILE

I am a recent 1st class BSc Physics graduate from University College London (UCL) who is looking for a job in front-end or full-stack software development. I have intermediate coding experience in key languages & skills including Java, Python, HTML, CSS, JavaScript, React, Node.js, SCSS & Git. In my time at _nology I have completed projects such as a JS snake game, a music database website (with API and Firebase integration) and a shift reporter project commissioned by a South African mining company.

EDUCATION

BACHELOR OF SCIENCE, 1ST CLASS

University College London | 2017-2020
Achieved an average mark in my final year of 77%.
